

lab10 - Feature #50

Get lab10 domain

06.02.2017 15:11 - didi

Status:	Closed	Due date:
Priority:	Normal	
Assignee:	didi	
Target version:		
Description It would be useful to already have a lab10 domain, e.g. for Redmine. My favourite: lab10.org .net is taken. .io is expensive. Other options: .cool, .tech, .guru, ... :-) TODO: <ul style="list-style-type: none">• create new inwx account and register there• move Redmine• create E-Mail accounts?

History

#1 - 03.03.2017 18:48 - didi

Checking if it's possible to already get lab10.coop without the legal entity existing.

I mailed to inwx (which however I'm quite sure doesn't support coop domains) and <http://www.domains.coop> (operated by the [International Co-operative Alliance](#)). The latter points to <http://www.identity.coop/> for domain registration and includes a *Coop Marque*.

gandi.net looks like a fitting registrar, however coop domains are quite expensive (67€ / year). lab10.io, on the other hand, is *only* 29€ here.
