<b>Target version:</b>			
<b>Description</b> Based on <a href="#">#62</a> , elaborate the website structure and choose a tech stack suited for it. As much as possible should also work well on mobile devices.  Blockchain related functionality should work regardless of browser environment, similar to die-unendliche-wahl.at: If a web3 environment is available (e.g. Metamask), use it. Otherwise fall back to a remote web3 service.
